**Profile:**

In my positions I have worked as part of a team in remerchandising parts of the store to reach and exceed sales targets. I have several key components to my job including working in a team to get jobs finished within a timeframe, organising stock to tidy the work area and make stock easier to fill. I am used to working with people in face to face environment and i believe this can help me within the gym industry. I also spent several years as a cleaner and think this experience can also be put to good use within the gym are and help keep the equipment clean. Weightlifting and general fitness is an industry i am extremely passionate about and a sector I have always wanted to work in, I keep myself up to date with all fitness knowledge including workouts and nutrition. I am used to working late nights, early mornings and weekends and I am happy with whatever hours you have, I am fully flexible and will make sure i can meet your needs and help out whatever way is necessary. I pursued public services in college and my favourite part of the course was the sports and fitness regime we had to complete in order to pass. I would very much appreciate if you could take the time to meet me and i can prove I am up for the challenge.
